

CION-AL DATASET LICENSE AGREEMENT

Introduction

The CION-AL dataset is a large-scale dataset containing person images. In constructing the CION-AL dataset, we utilize our proposed progressive identity correlation seeking strategy to tag the images in LUPerson-NL with more accurate identity labels. It contains 3,898,086 images of 246,904 identities totally. It is collected and annotated by National Key Laboratory of Multispectral Information Intelligent Processing Technology, School of Artificial Intelligence and Automation, Huazhong University of Science and Technology (HUST). The CION-AL dataset is released for researchers with free of charge.

Rules

1. **Redistribution:** The CION-AL dataset, either entirely or partly, should not be further distributed, published, copied, or disseminated in any way or form without a prior approval from the creators (Jialong Zuo and Changxin Gao) of the dataset, no matter for profitable use or not.
2. **Commercial Use:** The CION-AL dataset, entirely, partly, or in any format derived thereof, is not allowed for commercial use without a prior approval from the creators.
3. **Modification:** The CION-AL dataset, either entirely or partly, is not allowed to be modified without a prior approval from the creators.
4. **Acknowledgement:** The following paper or any of its upgraded versions should be cited in all documents and papers using the CION-AL dataset for experiments:
Zuo, Jialong, et al. "Cross-video Identity Correlating for Person Re-identification Pre-training." NeurIPS 2024.
5. **Indemnification:** All persons using the CION-AL dataset should agree to protect the privacy of all the subjects in it. The users should bear all responsibilities and consequences for any loss caused by the misuse.
